Paediatric First Aid

This course will provide you with the knowledge both practical and theoretical to deal with accidents and emergencies involving babies and young children.

On satisfactory completion of the course and final assessment, a certificate valid for three years will be issued.

Course Content

- Initial assessment of the casualty and situation
- Care of the unconscious casualty
- Resuscitation procedures
- Asthma and diabetic emergencies
- Choking
- Head injuries, including neck and spinal injuries
- Seizures, including epilepsy and febrile convulsions
- Sprains, strains and fractures
- Poisoning, bites and stings
- Bleeding and shock / burns and scalds / electric shock
- Foreign objects
- Childhood conditions (e.g. measles, meningitis, croup)
- First aid kit and administration of medication

Learning Objectives

- To competently and confidently assess a casualty
- To establish Priorities of Treatment
- To demonstrate basic Life Support Skills (Airway, Breathing, Circulation)
- To administer First Aid treatment for specific conditions/injuries
- To recognise common childhood conditions (e.g. measles, meningitis, croup)
- To know and confidently use the standard contents of a first aid kit

Course Duration

2 Days
