

MOBILE ELEVATED WORK PLATFORMS

Telescopic, Boom and Scissors

Learn to operate the MEWPS safely and efficiently with our trained and certificated instructors.

More detail

Mobile Elevated work platforms (MEWPS) provide a safe way of working at height. This course enables delegates to acquire skills and knowledge required to safely and efficiently operate MEWPS, such as cherry pickers, boom or scissor lifts.

All courses are conducted on site in the surroundings that the delegates will be familiar with and on equipment that they will be operating.

Location:
On your site.

1 day duration

What you will learn

- Legislation and summary of regulations
- Types of mobile platforms
- Personal Protective Equipment (PPE)
- Operation mode/travelling mode
- Prohibited uses
- MEWP hazards
- Safety precautions to reduce risk
- Weather, wind speed, and its effects (Beaufort Scale)
- Handling materials
- Daily visual checks
- Safety awareness
- Written and practical test

Learning Objectives

- To understand legislation relating to MEWPS
- To describe the different types of MEWP
- To be able to choose the correct MEWP for the job
- To list the possible hazards when operating MEWPS
- To manage the risks when working with MEWPS
- To carry out daily visual checks and inspections
