

AN INTRODUCTION TO RISK ASSESSMENT

Our course

Risk assessments are usually the lynchpin of health and safety management and are an important step in protecting employees and businesses.

As well as ensuring that you comply with the law, this course delivered by our NEBOSH qualified tutor combines practical risk assessment training with accident prevention and safety management.

By the end of the course delegates will leave with the ability to fully meet the requirement for the performing and recording of risk assessments under the Management of Health and Safety at Work Regulations 1992.

Location:
SIGTA in Portslade or
on your site

Duration:
Half day
