

BACK TO SCHOOL

Happy New Year to you all

Apprenticeships

Apprenticeships starting to come in for 2025

Last year was busy with well paid apprenticeships with world-class companies and this year is shaping up to be even better.

We work across Sussex and Surrey and already we are being contacted by our member companies and organisations who will be recruiting apprentices this year.

You can expect to see apprenticeship vacancies for:

- Flight Simulator Technicians who will learn to maintain and repair flight simulators used for pilot training (Crawley).
- Electronics Repair Technicians for digital signage (Lewes).
- Repair and Servicing of electrical/electronic medical devices used in hospitals (Hastings/Brighton NHS).
- Electro/Mechanical Engineering Fitters building complex equipment used in medical applications (Crawley).
- Technician Machinists to use the latest computer controlled machining centres to produce complex components (Hailsham).
- Engineering Technicians for high-tech engineering involved in design, build, test and quality assurance (Storrington).

We will also have vacancies for apprentices in Computer Aided Design, Engineering Maintenance, Business Administration, Customer Service and much more.

Circle back to our vacancies page regularly as we have new apprenticeships throughout the year.

You will need GCSEs:

- English grade 4 and above
 - Maths grade 4 and above
- and three others – IT is useful for these apprenticeships.

What will you learn?

You will develop a highly transferable set of skills that can be applied in all sectors. This includes small and large businesses alike; from the public sector, private sector and charitable sector.
