

Visit our apprenticeships page for more information

Apprenticeship vacancies - right now!

Across Sussex we are recruiting apprentices for:

- Computer Aided Design
- Engineering Technical Support
- Machining Technicians
- Business Administrator
- Test/Quality Engineer
- Product Development
- Toolroom

and more!

Have a great holiday break!

Our first apprentices to complete our AME course!

We are skipping regular news this month to celebrate our SIGTA apprentices who have just completed their two year Advanced Manufacturing Engineering (Development Knowledge) Course. They have studied mechanical, electrical & electronic principles in engineering, drawing for technicians, engineering materials, digital electronics and much more.

Here are the first apprentices to complete our course introduced two years ago with our tutors Rob and Mo left and right front. Well done to our fab apprentices!!!

Planning a careers event?
Get in touch and we will be delighted to attend.
