Let's hear it for the girls!

Things are changing...

More and more girls are choosing engineering as a career - like Georgina who has just completed her Level 3 apprenticeship with Unibloc Hygiene Technologies in Hailsham.

Working in Technical Support means you work as part of a team to provide technical support and expertise for all areas of engineering and manufacturing.

Well done Georgina!

Why become an apprentice?

Becoming an apprentice offers several compelling benefits, making it an attractive career path. Here's why:

- Earn a good salary while gaining valuable skills and experience.
- Get 'hands on' experience in a real job - this real world training is crucial for developing the skills and competencies required for the job.
- Get trained by experienced professionals in your workplace - This mentorship can be invaluable for personal and professional growth.
- Gain nationally recognised qualifications which can enhance employability and career advancement opportunities.
- Apprenticeships provide a clear pathway for career progression - With experience and additional training, apprentices can advance to higher level positions, such as supervisory or managerial roles. I regularly meet Directors who were once SIGTA apprentices!
- Apprenticeships usually include a blend of on the job training and classroom instruction.
- Working within an industry allows apprentices to build professional networks.
- Avoid the huge debt associated with traditional college education.
- Apprenticeships provide a sense of accomplishment and pride in mastering a trade or profession. The ability to create, build, or provide a service can be deeply rewarding!
