

New apprenticeships / New qualifications

Apprenticeships

Revamped qualifications for 2024/2025

We have placed many school leavers in apprenticeships this year and have introduced new and revamped qualifications in the form of Apprenticeship Standards.

Our training centres in Portslade and Eastbourne are now delivering the day release training for most of our apprenticeship programmes, which were previously delivered by local colleges. This means smaller classes, consistency of tutors, a high level of support for learners and their employers.

We now deliver all day release training for technical design, electrical/electronic and mechanical engineering fitting, technical support, plant maintenance, NHS healthcare technicians and more. Our training officers visit the apprentice in their workplace to monitor, assess and help the learner achieve their qualifications.

When recruiting an apprentice for a company, we produce a video to accompany the advertising, giving an insight into what the apprenticeship will cover. Click [here](#) to see some of the videos we have made for our SIGTA member companies.

New apprenticeships throughout the year*

Planning a careers event?

Get in touch and we will do our best to attend. We are a small team and get to as many events as we can but sometimes there are clashes with so many schools throughout Sussex.

You will find full info on the schools page of our website.
